MANUEL DAVID PEREZ HIGUERA

SKILLS

Enthusiasm and optimism - Confidence - Focus - Self management - Leadership - Empathy - AdobeXD - Test Driven Development - Jest - Jasmine - Playwright - SCRUM - Git - AWS CLI - CI/CD Pipelines - Jenkins - JFrog - Github - Bitbucket - Firebase - Wordpress - Bootstrap - HTML - CSS - SASS - Javascript - Web Components - JSDocs - Typescript - Node - NVM - Vue - Nuxt - React - Angular - Angular Material - Style Dictionary - Storybook - Design System - Atomic Design - Nx - C++ - PHP - MySQLi - Composer .

EXPERIENCE

Capgemini— *Angular Developer*

NOVEMBER 2023 - PRESENT

Development of a Design System to update all the UI/UX of the platforms of an important bank of the U.S. We transform UX/UI requirements (Abstract tool) using Style Dictionary built in Javascript to generate the Design System tokens. Then we wrap a bundle published on JFrog such all developer teams can consume it through an npm package and use that tokens into the components across all platforms. I collaborate in the Angular Developers team who are in charge of the web platforms using Angular 17, SASS, to perform testing with Jest and automation with a private library.

Aliser— *Web Developer*

OCTOBER 2023

Project-contract for a local store. I developed a ticket management system developed in php and managed with composer. Handling connection and queries with MySQLi.

Palace Resorts — *Front-end Developer*

JULY 2022 - JANUARY 2023

Project-contract for the "Palace Elite" site development. using Typescript as programming language on Nuxt for the Server Side Rendering and Tailwind-css as css framework. CLEAN architecture, Strapi CMS and AWS serverless services on the backend.

Soriano Ariza y Asociados — *Front-end Consultor*

JANUARY 2022 - JULY 2022

Frontend development in software solutions for private companies. WebView-like for mobile and web apps. Using Vue Framework, tailwind css, python, scrapy and selenium.

Juniper Data Center — *Front-end Developer*

MARCH 2019 - JANUARY 2022

Website development and content migration for responsive websites, based on design requests. These sites are based on Angular and .NET, CMS DNN, Scss and Less preprocessors, JQuery library and Bootstrap framework.

Jast Media — *Web Support Agent*

JUNE 2018 - MARCH 2019
